

- Launched **Data Design Program (DDP)**, which combines data science and design approaches and incorporates research projects in collaboration with companies
- Established the **Faculty and Graduate School of Social Data Science (SDS)** in **April 2023** to integrate social and data sciences. More than 70% of the students in the four existing faculties took the data science-related courses

Cumulative total of enrollees in the DDP

- DDP is a three-year program for second through fourth-year students with approximately 30 students selected per grade
- Introducing project-based learning (PBL) to tackle issues presented by companies and local governments

Percentage of students enrolled in data science-related courses in 4UG programs apart from SDS

- Percentage of enrollees who have taken "Introduction to AI," "Computer Programming Basics," and "Computer Literacy"
- The "Introduction to AI" program was accredited by the MEXT as an "Accreditation System for Mathematical and Data Science and AI Education Programs (Literacy Level)" in 2021
