

30 September 2021  
Student Services Division

To all students

### Our response to COVID-19 from 1 October 2021 onwards

On 28 September 2021, it was announced by the national government that the State of Emergency currently declared for Tokyo will come to an end on 30 September 2021. However, at this university, as stated in the notification dated 29 September 2021 from the Head of the Hitotsubashi Risk Management Office, the Hitotsubashi University Activity Restrictions Index for the Prevention of the Spread of COVID-19 will be kept at its current Level 3 (Restricted (intermediate)) for the two to three weeks from 1 October 2021. During this period, we will make a further decision about our subsequent response, based on close monitoring of factors including the state of infections both within and outside the university.

At present, there is a downward trend in the number of infected people in Tokyo. However, given concerns about a rebound (renewed spread of infections) after the relaxation of restrictions on movement, as well as the onslaught of a sixth wave, all students are asked to reread the message from the three vice presidents of this university, “At the start of classes for the 2021 autumn semester”, and to continue to take note of the following points.

Please also be sure to check the university website, CELS, etc. regularly for the latest information, as all notifications and communications from the university are subject to alteration in response to the situation.

#### 1. How to respond if you sense anything unusual about your physical condition:

If you develop a fever of 37.5 degrees Celsius or above or symptoms such as a cough or sore throat, or if you observe any equivalent physical abnormalities, or even a small impairment to your sense of taste or smell, irrespective of whether or not these are due to this virus, please avoid going outside for anything which is not urgent, including lectures and other university business; and please contact **your primary care doctor or the Tokyo Municipal Consultation Center for Cases of Fever (03-5320-4592)** to obtain their guidance.

2. If you are diagnosed as positive or suspected positive as the result of testing by a medical institution:

At the same time as following the guidance of the medical institution, please report this immediately by telephone to the university's health center, and do not under any circumstances come to campus or take part in extracurricular activities, etc.

Hitotsubashi University Health Center: Weekdays, 8:30 – 17:15 (Tel. 042-580-8172)

**\* Contact details during the period when the entire university is on holiday (11 – 15 August): (Tel: 080-1034-9049, available 9:00 – 17:00)**

<https://www.hit-u.ac.jp/eng/campuslife/health/center.html>

3. Entry to the university premises (including all university facilities located off campus):

- 1) In principle, please do not enter for any non-urgent or unnecessary reason.
- 2) However, if you are unable to avoid entering for a necessary reason, please ensure that you bring your student ID card when you enter.
- 3) Even in cases falling under 2) above, please spend as short a time as possible on university premises.

4. Everyday activities

1) Please make every effort to act prudently, such as avoiding participation in gatherings attended by large numbers of people or those whom you do not normally meet and which involve food and drink, and other events or activities which carry a high risk of infection. At the same time, please continue to ensure that you wash your hands frequently, gargle, sanitize your hands, and observe mask etiquette. When eating out, please do your best to choose eating and drinking establishments certified by the local government.

Also, please strictly refrain from behavior such as large parties at home involving food and drink, or the group drinking of alcohol on the streets, in parks, etc.

2) Please avoid crossing prefectural boundaries wherever possible. However, if crossing prefectural boundaries is unavoidable, please make every effort to do so in a small-scale, distributed manner (travel in small groups and consider your destination, choosing times and places which are not crowded).

5. Extracurricular activities, etc.:

- 1) For the time being, please cancel not only gatherings involving eating and drinking, and other events or activities which carry a high risk of infection, but also, in principle, those extracurricular activities authorized by the university to restart (with the exception of those activities which have been granted special permission to take place under Level 3).
- 2) Activities by groups of friends shall be treated in the same way as extracurricular activities by organized groups or clubs.

6. Overseas travel, or entry to Japan from overseas:

At the same time as refraining from making any non-urgent or unnecessary trips overseas or entering Japan from overseas, where such travel or entry is unavoidable, please follow the guidance given e.g. during the medical inspection at the airport or port of entry, and strictly observe the period of isolation and other matters which are mandated by law.
