

12 April 2021
Student Services Division

To all students

Our response to COVID-19 (while focused measures to prevent the spread of COVID-19 are in force)

The government announced today, 9 April, that “focused measures to prevent the spread of COVID-19” would be applied in Tokyo, under the provisions of the Act on Special Measures against COVID-19. In response, the alert level of the Hitotsubashi University Activity Restrictions Index for the Prevention of the Spread of COVID-19 has been altered to Level 3 (<https://www.hit-u.ac.jp/eng/covid-19/index.html>).

All students are asked to take note of the following points.

Please also be sure to check the university website, CELS, etc. regularly for the latest information, as all notifications and communications from the university are subject to alteration in response to the situation.

1. Overseas travel, or entry to Japan from overseas:

At the same time as refraining from making any non-urgent or unnecessary trips overseas or entering Japan from overseas, where such travel or entry is unavoidable, please follow the guidance given e.g. during the medical inspection at the airport or port of entry, and strictly observe the period of isolation and other matters which are mandated by law.

2. How to respond if you sense anything unusual about your physical condition:

If you develop a fever of 37.5 degrees Celsius or above or symptoms such as a cough or sore throat, or if you observe any equivalent physical abnormalities, or even a small impairment to your sense of taste or smell, irrespective of whether or not these are due to this virus, please avoid going outside for anything which is not urgent, including lectures

and other university business; and please contact the public health center with jurisdiction over your area to obtain their guidance.

3. Entry to the university premises (including all university facilities located off campus):

- 1) In principle, please do not enter for any non-urgent or unnecessary reason.
- 2) However, if you are unable to avoid entering for a necessary reason, please ensure that you bring your student ID card when you enter.
- 3) Even in cases falling under 2) above, please spend as short a time as possible on university premises.

4. Everyday activities:

At the same time as making every effort to act prudently, such as doing everything to avoid participation in gatherings involving eating and drinking, or other events with a high risk of infection, please continue to ensure that you wash your hands frequently, gargle, sanitize your hands, and observe mask etiquette.

5. Extracurricular activities, etc.:

- 1) For the time being, please cancel not only gatherings involving eating and drinking, and other events or activities which carry a high risk of infection, but also, in principle, those extracurricular activities authorized by the university.
- 2) Activities by groups of friends shall be treated in the same way as extracurricular activities by organized groups or clubs.

6. If you are diagnosed as positive or suspected positive as the result of testing by a medical institution:

At the same time as following the guidance of the medical institution, please report this immediately by telephone to the university's health center, and do not under any circumstances come to campus or take part in extracurricular activities, etc.
