

To all students

Our response to COVID-19 (while a State of Emergency is in operation)

The government has announced the declaration of a State of Emergency in Tokyo and three other prefectures from 25 April. Bearing in mind the fact that the alert level of the Hitotsubashi University Activity Restrictions Index for the Prevention of the Spread of COVID-19 was raised to Level 3 (<https://www.hit-u.ac.jp/eng/covid-19/index.html>) on 12 April, when “focused measures to prevent the spread of COVID-19” were applied in some regions of Tokyo, there are no plans to change the level following the declaration of this State of Emergency.

All students are asked to continue to take note of the following points.

Please also be sure to check the university website, CELS, etc. regularly for the latest information, as all notifications and communications from the university are subject to alteration in response to the situation.

1. Overseas travel, or entry to Japan from overseas:

At the same time as refraining from making any non-urgent or unnecessary trips overseas or entering Japan from overseas, where such travel or entry is unavoidable, please follow the guidance given e.g. during the medical inspection at the airport or port of entry, and strictly observe the period of isolation and other matters which are mandated by law.

2. How to respond if you sense anything unusual about your physical condition:

If you develop a fever of 37.5 degrees Celsius or above or symptoms such as a cough or sore throat, or if you observe any equivalent physical abnormalities, or even a small impairment to your sense of taste or smell, irrespective of whether or not these are due to this virus, please avoid going outside for anything which is not urgent, including lectures and other university business; and please contact the public health center with jurisdiction

over your area to obtain their guidance.

3. Entry to the university premises (including all university facilities located off campus):

- 1) In principle, please do not enter for any non-urgent or unnecessary reason.
- 2) However, if you are unable to avoid entering for a necessary reason, please ensure that you bring your student ID card when you enter.
- 3) Even in cases falling under 2) above, please spend as short a time as possible on university premises.

4. Everyday activities:

At the same time as making every effort to act prudently, such as doing everything to avoid participation in gatherings involving eating and drinking, or other events with a high risk of infection, please continue to ensure that you wash your hands frequently, gargle, sanitize your hands, and observe mask etiquette.

5. Extracurricular activities, etc.:

- 1) For the time being, please cancel not only gatherings involving eating and drinking, and other events or activities which carry a high risk of infection, but also, in principle, those extracurricular activities authorized by the university.
- 2) Activities by groups of friends shall be treated in the same way as extracurricular activities by organized groups or clubs.

6. If you are diagnosed as positive or suspected positive as the result of testing by a medical institution:

At the same time as following the guidance of the medical institution, please report this immediately by telephone to the university's health center, and do not under any circumstances come to campus or take part in extracurricular activities, etc.
